

Mahmoud Adel El-Araby

Software Engineer

+201270916713 | elrbyoda@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFILE

Full-Stack Software Engineer specializing in Flutter, React.js, and Node.js for building scalable cross-platform mobile and web applications. Proficient in Dart, JavaScript, SQL, and Firebase, with expertise in RESTful APIs, NoSQL databases, and user-centered UI/UX design. Strong problem-solver skilled in Agile development, debugging, and performance optimization.

SKILLS

Programming Languages: Dart, Java, JavaScript
Frameworks & Tools: Flutter, Node.js, Bootstrap, Android Studio, Visual Studio Code
Databases: Firebase Realtime DB, Firestore, NoSQL, SQL
Version Control: Git, GitHub, CI/CD
Methodologies: Agile, Scrum, Problem-solving, Teamwork, Communication, Debugging

EDUCATION

National Damietta Institute for Engineering and Technology 2019 – 2024

- Bachelor in Communication and Electronics Engineering | Grade: Very Good

Mohamed El-Said Experimental School | High School Diploma 2019

PROFESSIONAL EXPERIENCE

Software Developer, Full-Stack & Mobile – [Mozaik](#) Nov 2025 – Apr 2026

- Engineered, developed, and deployed a full-stack platform for job and project management used by customers and internal teams.
- Built end-to-end system including frontend dashboards (React), backend APIs (Node.js), and database architecture.
- Managed the full lifecycle from requirements and architecture to development and deployment.
- Built and launched a full-stack platform within 2 months, independently managing frontend, backend, database, and hosting.

Web Developer – ISources Portfolio Website Oct 2025

- Designed a professional company portfolio website using HTML, CSS, Bootstrap, React.js, and Node.js, hosted on Bluehost.
- Enhanced site performance and SEO, improving page load speed by 35% and increasing session duration by 10%.

Flutter Developer – Food Ordering App Sep 2024 – Nov 2024

- Developed a cross-platform food ordering app using Flutter and Firebase, featuring a responsive, component-based UI and real-time order tracking.
- Improved order management efficiency by 25% through optimized database design and streamlined order workflow.

PROJECTS

Furnish Modern Oct 2025 – Dec 2025

- Built a furniture store web application using HTML, CSS, React.js, Bootstrap, Node.js, Express, and MongoDB.
- Integrated the Stripe API for secure online payments, achieving 100% successful transaction processing during testing.

Nova AI – AI Chat Assistant Jul 2025

- Engineered an AI-powered chat assistant in Flutter with Hive (lightweight local key-value store) for session management, multiple conversational personas, and interaction modes; refined prompts and model configuration, achieving a 40% improvement in response relevance across 100+ test conversations.

Graduation Project – Vital Link Jan 2024 – Jul 2024

- Delivered a mobile application for real-time patient vitals monitoring using Flutter and Firebase.
- Implemented real-time data synchronization and improved performance, improving monitoring accuracy by 20%.
